Chengdu, China

EDUCATION

- **M.S. University of Electronic Science and Technology of China** 2018.09 - 2021.06
Computer Science, College of Computer Science and Engineering
- **B.E. University of Electronic Science and Technology of China** 2014.09 - 2018.06
Computer Science, Yingcai Honors College of UESTC

EXPERIENCE

- **Depth Estimation** from 2019.04
 - Depth and ego-motion estimation is crucial for various applications in robotics and computer vision. However, collecting large and varied training datasets with accurate ground truth depth for supervised learning is itself a formidable challenge.
 - I am focusing on using Deep Learning to solve **Un-supervised Monocular Depth Estimation**
- **Web FrontEnd Developer @Sibbay** 2017.12 - 2019.3
 - Remote && Part-time
 - Develop the mini-program that helps people to track their health data, participate in the agile development workflow with BackEnd Developer, PM and QA. Improve the program according to the users' feedback.

- **Web FrontEnd Developer @Baidu** 2016.12 - 2017.5

- Intern
- Develop Baidu 'FengChao' ad-serving system, the technology stack includes React && Redux && Webpack && Git.

PROJECTS

- Research on Depth Estimation** 2018 - on-going

- Aliquam dictum volutpat leo, et pellentesque metus tincidunt nec. Proin dolor diam, pellentesque ac molestie consectetur, tempus id neque. Mauris semper semper nisl, nec pulvinar dolor vehicula quis. Cras sagittis varius tempor.

- Web Developer (Remote)** 2017.12 - 2019.3

- Aliquam dictum volutpat leo, et pellentesque metus tincidunt nec. Proin dolor diam, pellentesque ac molestie consectetur, tempus id neque. Mauris semper semper nisl, nec pulvinar dolor vehicula quis. Cras sagittis varius tempor.

- Web Developer (Intern)** 2016.12 - 2017.5

- Aliquam dictum volutpat leo, et pellentesque metus tincidunt nec. Proin dolor diam, pellentesque ac molestie consectetur, tempus id neque. Mauris semper semper nisl, nec pulvinar dolor vehicula quis. Cras sagittis varius tempor.
